Queen Samuel

Backend Developer

samuellqueenie@gmail.com | +234 9162577076 | Oyo, Nigeria | http://linkedin.com/in/queen-samuell |

PROFESSIONAL SUMMARY

Detail-oriented and solution-driven Backend Developer with a strong foundation in JavaScript, Node.js, and Express.js. Experienced in building scalable APIs, integrating third-party services (e.g., Twilio, SendGrid), and working with both SQL and NoSQL databases. Well-versed in AI integration, using LLMs like OpenRouter to enhance developer tools. Skilled in designing clean, maintainable backend architectures and collaborating cross-functionally to deliver robust web applications. Passionate about leveraging AI to solve real-world problems, writing efficient code, and continuously improving systems through automation and smart tooling.

EXPERIENCE

BACKEND DEVELOPER/ Work Experience Program

Mentorled May 2025 – July 2025 | Remote

- Developed and maintained scalable RESTful APIs using **Node.js and Express.js**, enhancing application performance and modularity.
- Collaborated with frontend developers to design and integrate APIs, ensuring seamless data exchange across the application.
- Utilized **MongoDB** to structure and manage data models, implementing Mongoose for schema validation and relationships.
- Implemented user authentication and authorization using **JWT and bcrypt**, improving security and access control.
- Followed Waterfall and Agile methodology, contributing to code reviews, meetings, and collaborative debugging sessions.
- Integrated **Twilio's SMS service** for OTP verification and **SendGrid** for transactional email delivery.
- Integrated Socket.IO to enable real-time live chat functionality, allowing users to send and receive messages instantly.
- Deployed and monitored backend services using Digital Ocean, Postman for testing and swagger for documentation.

EDUCATION AND CERTIFICATIONS

- BA, English Language – University Of Ilorin, Nigeria (2021)
- Backend Development Certificate – Africa Agility(2023)

SKILLS

- Javascript | Typescript | MongoDB | ExpressJs | Git/Github | MySQL

PROJECTS

API Development for a Software Development Website

Technologies Used: Express, Node.js, Javascript, MongoBD, Nodemailer, Render, Swagger.

Developed a fully functional backend API for the Pitchers platform, handling user authentication (including Google OAuth), user management, and contact form submissions.

- Developed and deployed a robust RESTful API for Pitchers, a user-centric web platform.
- Implemented user authentication (JWT), including email/password login, Google OAuth, and password reset via email.
- Built user management endpoints for listing, retrieving, and deleting users
- Documented the entire API using Swagger (OpenAPI 3.0) for developer collaboration and testing.
- Deployed the backend service on Render with environment-based configuration for seamless development access.

- Documentation: https://pitchers-backend.onrender.com/api-docs

DevConnect || Developers Networking Platform

Technologies Used: Express, Node.js, MongoBD, OpenRouter(LLM), Render, Multer, Swagger.

Built a backend API for a platform where developers can connect, follow each other, and share bug-solving journals. Implemented secure auth, user/profile management, follow/unfollow system, and a journaling feature.

- JWT-based authentication and protected API routes.
- Developer profiles with bio, skills, current role, and projects
- Follow/Unfollow system to connect with fellow developers

- DevJournal (Bug Journaling) — Log bugs, document causes and solutions
- AI-powered debugging assistant via OpenRouter, integrated into DevJournal
- Advanced search, filtering, and pagination for users and journals
- Post creation with image uploads for sharing dev updates or resources
- Github: https://github.com/queentifee/DevConnect
- Documentation: https://devconnect-zz93.onrender.com/api-docs
